CRUSHBANK

AI For Your Business, Powered By Your Data

Employees are slowed down by the fact that 90% of data is unsearchable, causing delays in getting work done. New employees find it hard to navigate all the systems where data is stored. Legacy systems hold troves of inaccessible data and are costly to maintain.

90%
of data is
unsearchable

(IBM Study)

19%
of the workday
is spent searching for
information

(McKinsey)

It takes
4 months
to get a new employee
up to speed

(Client Feedback)

CrushBank Neuro significantly enhances business efficiency by simplifying data, document, contract and customer information retrieval using powerful conversational search. You can't trust open model AI system for your business uses. CrushBank is build with your data.
